

This is a simplified health program to help support the body to heal naturally. Please be advised that the lifestyle changes and supplements suggested are not for treating the disease but are only for a support to health.

Irritable Bowel Syndrome (IBS) ***Colitis, Ulcerative colitis, Spastic Colon Ileitis***

Over 70 Million Americans suffer from a digestive disorder. IBS affects as many as one in five US adults. A chronically inflamed, painful colon, IBS is often a result of food allergies (at least 65% of all cases are caused by allergies), usually to gluten, cheese, corn, or eggs. Lactose intolerance symptoms mimic those of IBS and colitis. Most victims are between the ages of 20 and 40, and have stressful jobs or lifestyles. Colon membranes become irritated and inflamed, and the body forms pockets in reaction. In severe cases, ulcerous lesions line the sides of the colon.

If appendicitis-like sharp pains appear, seek medical attention immediately. Conventional medicine has not been able to address IBS or colitis very effectively. Some drugs for these conditions have been pulled from the market due to causing more intestinal issues, and in some cases, even death. Natural therapies have shown great effects, and can reduce the need for drugs. Diet changes are a MUST. Healing herbs and supplements will NOT work without diet changes.
